ASAMUSHI SYMPOSIUM OF MARINE BIOLOGY
THE THIRD YEAR
SYMPOSIUM ON LIFE-CYCLE OF MARINE ANIMALS

The Asamushi Symposium on Marine Biology was advocated by the members of the Biological Institute and of the Marine Biological Station of Asamushi of the Tôhoku University as one of the laboratory projects for contributing to the progress of marine biology in Japan.

The meeting of the first year at Asamushi held on the 30th of May 1958 was on the experimental embryology of marine animals and related fields, and that of the second year was held on the 29th of May 1959 on marine ecology, mainly the ecology of the intertidal and littoral animals and communities.

The meeting of the third year was held on the 3rd of June 1960 on the life-cycle, normal development and related fields.

The participants, who are persons having interest in the project including the staff of the Marine Biological Station of Asamushi, were invited to take part.

This symposium was supported by the Foundation in Support of the Marine Biological Station of Asamushi,

ETURÔ HIRAI
